

ERA LABXPERT™ LLP

Science And Precision - It's In Our DNA ! ERA, Your Ultimate Lab Partner

COMPANY PROFILE

About Us

At ERA LabXpert, we are a leading distributors and manufacturers of high-quality products, serving a vast network of researchers, laboratories, and healthcare providers. With a deep understanding of the evolving needs of the sectors, we provide a comprehensive range of cutting-edge reagents, equipments, tools, and consumables designed to support scientific advancement and innovation. Our extensive portfolio includes solutions for genomics, proteomics, molecular biology, analytical and bioprocessing, ensuring that our clients have access to the latest technologies and best-in-class products. With a focus on reliability, integrity, and customer satisfaction, we are committed to helping our partners drive breakthroughs in research, development and healthcare.

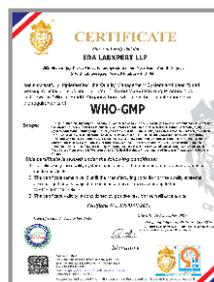

Products we offer

- **Laboratory Equipments** : Complete range of table top and high end equipments for research institutes, pharmaceutical companies and testing laboratories.
- **Plastic Wares** : General lab plastic wares such as micro tips, micropipettes, measuring cylinders, flasks and Cell Culture plastic wares such as tissue culture flask, plates, serological pipettes etc.
- **Columns** : HPLC and Protein Purification Columns from reputed brands.
- **Molecular Biology** : Nucleic acid extraction kits, Plasmid, Gel and PCR Purification kits. cDNA kits, SYBR Green, DNA Ladders, PCR Master mixes and Restriction enzymes.
- **Proteomics** : Protein purification system, protein ladders, western blotting solutions and consumables, antibodies etc.
- **Cell Culture Media** : DMEM, MEM and FBS with different origin, antibiotics & growth factor.
- **Laboratory Chemicals and Fine Chemicals** : AR and molecular grade chemicals for all laboratory work.
- **Other Services** : DNA writing, DNA reading, DNA editing, Protein expression, Antibody discovery, Custom peptide synthesis primer designing etc.

Our Team

Certificates

ERA LABXPERT™

Science And Precision - It's In Our DNA ! ERA, Your Ultimate Lab Partner

Gel Documentation

Stand-alone gel documentation imager features intelligent operation for an unrivaled ease of use. Just one click, it offers the best sensitivity and speed, and reaches the lowest limits of detection for your DNA, RNA and protein applications. Its elegant design and small footprint allow it to fit into any laboratory environment and no external computer needed.

High sensitivity

16-bit high sensitivity digital camera, detecting very low-abundance DNA/RNA.

One click to get the optimum gel image

Automatically capture images and identify the sample type when the sample tray is locked.

Stand-alone system, small footprint

Built-in 10.1-inch touch screen, no external computer needed.

Multi-touch screen

Double-tap the touch screen to capture the image, swipe up and down to adjust the contrast.

Vortex Mixer

Multi Tube Vortex Mixer

Centrifuge Low Speed

Mini Centrifuge High speed

3D Shaker

Orbital Shaker

Mini Dry Bath

Oil Free Diaphragm Vacuum Pump

Low Temperature DRY BATH

eppendorf

Eppendorf is a leading international life science company that develops, manufactures, and distributes instruments, consumables, and services for use in laboratories around the world. Eppendorf products are most broadly used in academic, research laboratories, pharma – BioPharma Companies and food industries.

Eppendorf offers pipettes, centrifuges (Refrigerated & Non-refrigerated), Ultra-centrifuge, automated pipetting robots, laboratory and industrial fermenters, PCR machines, CO2 Incubators, Deep freezers (-80°C), Shaker incubators, In vivo Imaging Systems.

CURIOSIS

Celloger® Pro

The Celloger® Pro is **the most advanced and latest product** in the Celloger® series. Providing researchers with **state-of-the-art functionalities**, it offers unmatched convenience and **exceptional image quality**, enhancing and expanding the scope of experiments.

Celloger® Mini Plus

The Celloger® Mini Plus is **a fundamental system** for live cell imaging. By offering essential and user-friendly tools for analyzing live cells, it **serves as a basic system** for researching dynamic cellular events, **representing a model** within the Celloger® series.

Celloger® Nano

The Celloger® Nano is **the most compact and economical system** among the Celloger® series. It can **wirelessly connect to a tablet or laptop**, enabling users to observe and analyze cells from anywhere. With its manual stage compatible with any vessels, it makes it easy to **quickly check the state of cells**.

Automated live cell imaging system Curiosis inc manufactures an innovative live cell imaging systems that redefines research capabilities. With its exceptional image quality and unmatched convenience, it empowers researchers with advanced features.

Benchmark Scientific offers high quality laboratory equipment such as Mini & Micro centrifuges, homogenizers, shaker incubators, 2D-3D rockers, Orbital shakers, Tube rotators, Probe Sonicator, Shaking water bath.

INTEGRA BIOSCIENCES

Integra Biosciences provides an extensive range of innovative laboratory products designed for precision and efficiency, including: Liquid Handling Systems, Safety Bunsen Burner, Media Sterilizer, Petri Dish Filler, Aspiration System, Reagent Dispenser and Dispenser Stalker. These products are essential for enhancing laboratory workflows and ensuring safety and reliability.

euofins

Eurofins Scientific through its subsidiaries is a world leader in food, environment, pharmaceutical and cosmetic product testing, discovery pharmacology, forensics, advanced material sciences, and in agro science Contract Research services.

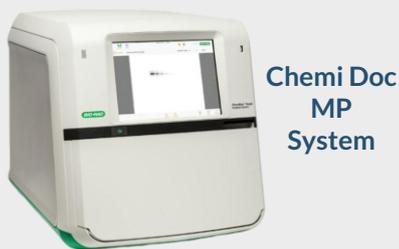

Products Like: DNA & RNA Oligonucleotides, Sanger Sequencing, Whole Plasmid Sequencing, Gene Synthesis & Molecular Biology, Next Generation Sequencing, Genotyping & Gene Expression.

Bio-Rad offers a suite of customizable products and services that ensures efficiency, reproducibility and reliability at each step of discovery, development and manufacturing. With more than 70 years of experience as a global leader in life science research and clinical diagnostics, Bio-Rad provides highest Quality integrated platforms and solutions.

Imaging Systems

Bio-Rad provides a full line of imaging systems with intuitive acquisition and data analysis software designed for a large spectrum of protein and nucleic acid applications.

Digital PCR

Droplet Digital™ PCR (ddPCR™) by Bio-Rad is an innovative technology that provides ultrasensitive nucleic acid detection and absolute quantification.

Electrophoresis and Blotting

Efficiently and reliably run, transfer, and analyze DNA and protein. Bio-Rad's 30 years of leadership in electrophoresis and blotting is fully reflected in a wide choice of instruments, precast gels, and reagents for protein and DNA analysis.

Chromatography

Bio-Rad chromatography products isolate, purify, and separate a wide range of biomolecules for analytical and preparative applications at laboratory- and process-scales, and streamline process development from drug discovery through clinical trials and bioproduction.

Real Time PCR System (qPCR)

CFX Real-Time PCR Detection Systems are powerful and flexible instruments, featuring 2-5 color multiplexing, advanced optical technology, and precise temperature control with thermal gradients.

PCR T100 Thermal Cycler

Conventional PCR T100 Thermal Cycler The 96-well T100 PCR thermal cycler offers an intuitive touch screen and reliable performance in a compact footprint.

HPLC Columns

Aminex HPLC Columns are an industry standard for the analysis of carbohydrates, organic acids and bases, and other small organic molecules based on ion-moderated partitioning.

Nucleo-pore

TOYOBO

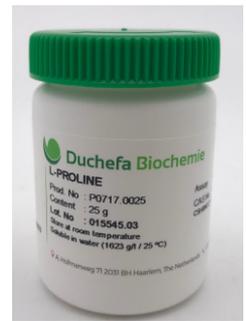

ZYMO RESEARCH
The Beauty of Science is to Make Things Simple®

PUREGENE

SPL
SPL LIFE SCIENCES

Duchefa

CELLclone™

Genetix stands at the forefront of life sciences, offering an extensive range of products across various renowned brands: G Brand, Nucleopore, Puregene, TOYOBO, SPL, Duchefa, ZYMO Kits, Cell Clone, Peristaltic Pumps, Extraction Machines and many more.

Nucleopore: Specializes in the purification of nucleic acids (DNA and RNA), proteins, and offers an array of DNA extraction kits for blood, bacteria, plant, fungus, total RNA extraction, miRNA extraction, PCR purification & gel extraction, and plasmid preparation (Mini, Midi, Maxi).

Puregene and TOYOBO: Provide essential reagents for life science research, including molecular biology tools, antibodies, protein & DNA ladders, cell-based and biochemical assay kits, biochemicals, and ELISA kits.

Duchefa: Offers a comprehensive range of products for plant tissue culture, biochemicals, containers, bioreactors, and other micro-propagation essentials.

SPL LIFE SCIENCES: A leading manufacturer and exporter of laboratory plastic consumables, such as cell cultures, cellular imaging tools, inserts, IVF culture dishes, cell stainers, cell scrapers, immunoassay plates, molecular biology dishes, and centrifuge tubes.

Zymo Research: A global leader in biotechnology, excelling in the fields of epigenetics, microbiomics, and the emerging Next-Gen Sequencing space.

AZENTA
LIFE SCIENCES

Automated Cold Storage Systems (Ambient to -20°C, -80°C and -190°C)

Azenta Life Sciences offers a range of automated sample storage and management systems designed to meet diverse requirements. These solutions ensure precise and reliable storage conditions tailored to your specific needs whether you require room/ambient temperature (+20°C) to cold temperature (-20°C, -80°C and -190°C) storage, 2D / 3D bar coded storage vial and bar coded vial scanner.

medical
systems

MEDICAL REFRIGERATION

BLOOD MANAGEMENT SOLUTIONS

VACCINE COLD CHAIN

MEDICAL DEVICE Certified (EU) 2017/745

SAVING LIVES THROUGH RELIABLE AND INNOVATIVE TECHNOLOGY

B Medical Systems is manufacturer, specializes in the production and global distribution of advanced medical refrigeration devices. Their extensive product range supports various applications in medical refrigeration and blood management: Medical Refrigeration: Laboratory Freezers /Refrigerators, Pharmacy Refrigerators, Medical Transport Boxes, Plasma Contact Shock Freezers, Plasma Storage Freezers, Blood Bank Chest Refrigerators, Blood Bank Refrigerators, Blood Transport Boxes, Vaccine Cold Chain: Comprehensive solutions for the storage and transportation of vaccines, ensuring optimal conditions throughout the supply chain.

Borosil's Scientific Limited provides a wide array of high-quality scientific and laboratory glassware, instruments, and pharmaceutical packaging products, including: Laboratory Glassware, Water Distillation Units, Survisimeters, Viscometers, Extractors, Filtration Products: Filtration Assembly, Membrane Filters, Laboratory Filter Media: Filter Papers (Circle and Sheets), Glass Fiber Filters, Thimbles, Laboratory Equipment: Kjeldahl Systems, COD Digesters, FAT Determination Systems, Heating Mantels, Stirrers and Hot Plates, Chillers, Lab Ware Dryers, Dry Baths, Vortex Mixers, Vacuum Pumps, Overhead Stirrers, Bottle Top Dispensers, Digital Burettes, Oil Baths, Data Loggers, Block-based Reaction Systems, Lab Reactors: Mini, Compact, Pilot, Bench, Floor Lab Reactors.

Cleanroom Environments / Lab Environments / Sterilization Wraps

Products that help eliminate cross-contamination are critical in controlled environments. Protect your processes and your people with head-to-toe solutions from Kimberly-Clark Professional – a global leader in lab and cleanroom products from the Kimtech® brand.

ThermoFisher SCIENTIFIC

Thermo Fisher Scientific encompassing brands such as Thermo Scientific, Applied Biosystems, Invitrogen, Fisher Scientific, Fermentas, and Alfa Aesar, provides a comprehensive range of products.

Lab Consumables

High-quality lab essentials for everyday use.

Lab and Research Chemicals

A diverse selection of chemicals for various research applications.

Cloning Kits

Complete solutions for gene cloning and manipulation.

Nucleic Acid Isolation Kits

Efficient kits for extracting DNA and RNA from various samples.

PCR QCR Kits

Quantitative PCR (qPCR) kits for precise nucleic acid quantification.

Electrophoresis Kits

Tools for separating DNA, RNA, and proteins based on size and charge.

DNA and Protein Ladder Markers

Standard markers for molecular weight estimation in gel electrophoresis.

Antibodies

A wide range of antibodies for research and diagnostics.

Cellular Analysis

Advanced tools for studying cell behaviour and characteristics.

Fluorometers

Instruments for measuring fluorescence in various applications.

Molychem is renowned for producing high-quality HPLC, AR/GR, and LR Grade Laboratory Reagents and Fine Chemicals, offering an extensive range of products, including: Laboratory Reagents & Fine Chemicals: HPLC Grade Chemicals, AR/GR Grade Chemicals, LR Grade Chemicals, Specialized Chemicals:Karl Fischer Reagent, Clinical / Diagnostic Reagents, pH Indicators (Solids, Solutions, Narrow Range), pH Indicators Papers with Colour Scale.

Biochemicals & Derivatives: Proteins / Proteins Derivatives, Quaternary Ammonium Compounds, Redox Indicators, Stains & Dyes, Biochemicals.

JEIO TECH is manufacturer for laboratory and environmental testing equipment for research endeavor in the field of biology, chemistry, medicine, pharmacology, and so forth.

META – LAB

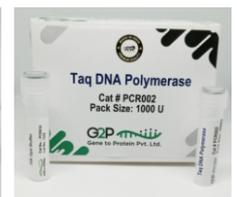

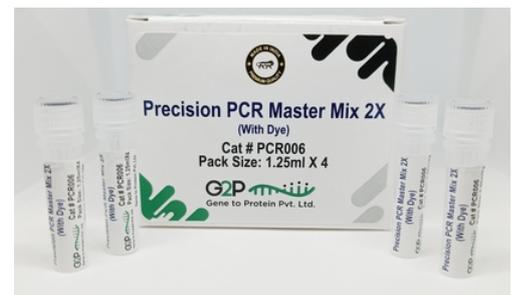

Metalab Is A Leading Manufacturer Of High-quality Scientific And Laboratory Instruments, Offering A Wide Array Of Products Designed For Precision And Reliability: Hot Air Oven, Lab And Bod Incubator, Humidity Chamber, Low Temperature Cryostate Bath, Water Bath Chiller, Vacuum Oven, Constant Temperature Water Bath, Constant Temperature Oil Bath, Viscosity Bath, Serological Water Bath, Water Bath, Dye Pot Water Bath Thermostatic Control Without Dye Pot, Laboratory Autoclave, Muffle Furnace, Rotary Shaker, Ultra Violet Fluorescence Viewing Cabinet, SS Petri Dish Box, Ultrasonic Cleaner.

Aczet is a leading manufacturer and supplier of complete solutions for a wide range of Weighing balance, Analytical lab scales & Industrial weighing systems, Moisture Balance, XRF, and Laser applications.

Gene to Protein aims to produce all enzymes, kits, and biochemicals that Indian life science researchers at their very own labs in Lucknow and Hyderabad. They strive for the highest standards of quality and consistency in product range of Antibodies, Buffers, dNTPs, Fluorescent Dyes / Quencher, DNA Marker and Protein Ladders, Modifying Enzymes, PCR Enzymes and Dyes, Plasmids, Primers, Purification Products and Restriction Enzymes.

17 Opto Electronics Inc founded in 2014, is a leading manufacturer of microscopes, application-specific optics, and various laboratory and histopathology equipment. With a legacy spanning several years, they specialize in high-tech precision microscopes and a wide range of customized opto-mechanical assemblies.

Product Range: Microscopes, Customised Opto Mechanical Assemblies, Micro Imaging Systems, Histopathology Equipments, Precision Optics and Many More.
